

Delivery systems

Delivery model, package architecture, interfaces and owner controls selected around the project's actual risks and decision rights.

COMMISSIONING FRAME

DECISION

Contracting and execution-system decisions

TEAM PATTERN

Delivery lead, engineering, procurement, controls and assurance

STANDARDS

Contract requirements, design authority and inspection plans

WHAT YOU RECEIVE

- 1 Delivery-model option register
- 2 Package and interface architecture
- 3 Controls, change and assurance design
- 4 Commissioning and handover logic

ACCEPTANCE PACK

A decision pack that links delivery form to retained risk, control rights, interfaces and acceptance evidence.

Evidence boundaries and assumptions are stated before analysis. Performance values publish only with a dated approved source.
