

# Exploration

Exploration programs designed around the next decision, from orientation and sampling controls to integrated target release.

## COMMISSIONING FRAME

---

### DECISION

Target generation and evidence release

### TEAM PATTERN

Exploration lead, field geologists, specialists and data control

### STANDARDS

JORC, SAMREC, PERC or CIM Definition Standards as required

## WHAT YOU RECEIVE

- 1 Exploration strategy
- 2 Field procedures and custody controls
- 3 QA/QC register and exception log
- 4 Integrated target-release pack

## ACCEPTANCE PACK

A traceable data package with release criteria, unresolved anomalies and a bounded next-stage scope.

Evidence boundaries and assumptions are stated before analysis. Performance values publish only with a dated approved source.
