

# Water and closure

Water, closure and transition decisions connected from early definition through progressive execution and relinquishment evidence.

## COMMISSIONING FRAME

---

### DECISION

Catchment, asset and end-state decisions

### TEAM PATTERN

Water, closure, environment, social and cost disciplines

### STANDARDS

Applicable permits, good international industry practice and closure criteria

## WHAT YOU RECEIVE

- 1 Water balance and receptor logic
- 2 End-state and progressive-closure basis
- 3 Monitoring and trigger framework
- 4 Cost, transition and relinquishment evidence

## ACCEPTANCE PACK

A controlled end-state package with responsibilities, assumptions, evidence thresholds and review points.

Evidence boundaries and assumptions are stated before analysis. Performance values publish only with a dated approved source.
